

## POSITION POSTING

### Title: Software/DB Developer

**Location:** Olympia, Washington

**Overview of Job Responsibilities/Duties:** CQuest is looking for a PowerBuilder developer with database procedure development skills to join our software development team. The selected candidate will work with other developers and analysts to develop and maintain a 400+ screen system deployed as 19 applications. The selected candidate will perform maintenance programming, development programming, maintain database procedures, and perform unit testing. In addition, the selected candidate will update technical documentation, and in some cases, re-engineer technical documentation by interpreting existing code. Candidates must have the ability to work with minimal supervision in a fast-paced environment, to meet deadlines, to learn new products and new processes quickly, and the ability to follow directions.

Experience or training in .NET is a plus, but not required. Prior experience with WIC business rules is a plus, but not required.

#### Required Skills:

- Ability to work with users to understand new requirements and isolate application defects.
- Ability to work on a software team and interface with business analysts and quality assurance staff.
- Ability to enhance, maintain, and provide production support using PowerBuilder 10.5 and higher.
- Ability to write database procedures. Ability to write expert-level SQL and understand existing SQL.
- Ability to maintain technical requirements documents. Ability to create technical requirements from existing code.
- Ability to document unit tests for handoff to testers.
- Highly motivated, able to work independently and complete assignments with minimal supervision.
- Excellent written and verbal communication skills.

CQuest will consider Visual Basic programmers if they have extensive experience reengineering Technical Requirements and excellent writing skills.

#### Required Experience and/or Education:

- 5+ years PowerBuilder development experience.
- Expert SQL skills required. 5+ years database procedure development experience.
- Experience with creating and updating technical documents such as Technical Specifications and Business Flow Diagrams.
- Sybase Adaptive Server Anywhere is preferred, but not required.

**To Apply:** Send cover letter and resume to:
